9.3

SCOR GENERAL / 10

COMENZI DE VERIFICARE

Comandă	Rezultat
cargo test --lib	18/18 PASS
cargo clippy -D warnings	0 erori PASS
cargo fmt --check	PASS
pnpm exec tsc --noEmit	PASS (0 erori)
pnpm test (vitest)	7/7 PASS
git status	CLEAN

A. FUNCȚIONALITATE

9.0 / 10

Feature	Status
Invoice create / edit / delete	create_invoice_draft, update, delete ✓
XML generation — UBL RO_CIUŠ	generator.rs, CustomizationID exact ✓
PDF generation	ubl/pdf.rs, storno_ref corect ✓
ANAF submission + status check	retry 401, state QUEUED→VALIDATED ✓
SPV sync zilnic	anaf_sync_spv + background 04:00 ✓
Storno — credit note 381	BillingReference + STORNEO atomic ✓
CSV import tranzactional	csv crate + BEGIN/COMMIT per factura ✓
XML import cu dedup SHA-256	import_invoice_xml, dedup ✓
Export SAGA / WinMentor / XLSX	integrations.rs + xlsx.rs, Decimal ✓
Received invoices SPV	received.rs complet ✓
Reports VAT	VALIDATED + SUBMITTED only ✓
SAF-T D406	SalesInvoices only — beta ■
Payments tracking	PAID/PARTIAL/UNPAID — 5 comenzi ✓
Recurring invoices	background 08:00 + auto-submit ✓
Multi-company	company_id pe toate companii ✓
Backup / restore integrity	PRAGMA integrity_check + .bak ✓
Auto-update semnatura	pubkey minisign + endpoint ✓
License activation	validare offline + anti-tamper ✓

- Buton Ribbon 'Plata' disabled desi pagina Payments e implementata complet — inconsistenta UI minora.
- SAF-T D406 etichetat corect 'vanzari, beta' — nu acopera o depunere D406 completa.

B. SECURITATE

9.5 / 10

- ✓ Zero SQL injection — 100% queries parametrizate cu ?, format! absent din query-uri
- ✓ Path traversal — sanitize_path_component whitelist [a-zA-Z0-9._-] + starts_with(base)

- ✓ Token ANAF — OS Keychain exclusiv (keyring), niciodata DB/settings/log
- ✓ OAuth PKCE — OsRng.fill_bytes: code_verifier 256-bit, state CSRF 128-bit
- ✓ Fara logging sensibil — doar body_len + status in tracing, zero token/body XML
- ✓ Backup restore — PRAGMA integrity_check pe pool temporar + .bak inainte de suprascriere
- ✓ Tauri CSP — default-src 'self', object-src 'none', base-uri 'none', form-action 'self'
- ✓ Updater signing — pubkey minisign real configurat in tauri.conf.json
- ✓ Zero unwrap() pe input utilizator — doar 4 pe constante infailibile cu justificare
- Minor: style-src 'unsafe-inline' in CSP — acceptabil pentru desktop, nu ideal
- Minor: fs:allow-app-*-recursive pe tot \$APPDATA, nu pe subfolder archive/ specific

C. BUSINESS LOGIC / CORECTITUDINE FISCALA

9.5 / 10

- ✓ Bani stocati TEXT/Decimal — migrare 006_amounts_to_text.sql, zero REAL in calcule
- ✓ Toate calculele cu rust_decimal — invoices, import, reports, storno
- ✓ Cote TVA {0,5,9,11,19,21} validate la create, update, import CSV si submit ANAF
- ✓ Rapoarte exclude DRAFT si QUEUED — WHERE status IN ('VALIDATED','SUBMITTED') + test
- ✓ Storno InvoiceTypeCode=381 + BillingReference + cantitati negative + tranzactie atomica
- ✓ CSV import tranzactional — BEGIN/COMMIT per factura, rollback automat pe eroare
- ✓ CustomizationID exact: urn:cen.eu:en16931:2017#compliant#urn:efactura.mfinante.ro:CIUS-RO:1.0.1
- Minor: full_number la CSV import: '{series}{number}' vs '{series}-{number:04}' in rest

D. RUST CODE QUALITY

9.5 / 10

18 teste acoperind: precizie Decimal, validare CUI cu prefix RO, CSV cu ghilimele, 8 reguli BR-RO (storno billing ref, cantitate negativa, cota TVA invalida, totaluri, adresa buyer), BOM UTF-8 XML, filtru status fiscal, money rounding, storno negativ.

- ✓ cargo fmt --check PASS — formatare uniforma pe tot codul
- ✓ cargo clippy -D warnings — 0 erori dupa curatarea a 41 de avertismente
- ✓ Zero unwrap() pe input utilizator — toate parsarile cu ? / unwrap_or / match
- ✓ AppError consistent cu #[from] sqlx/io/json/tauri — variante semantice
- ✓ Background tasks separate: poll.rs, recovery.rs, recurring.rs, spv.rs
- ✓ Backup restore cu PRAGMA integrity_check inainte de suprascriere DB
- Minor: fisiere mari justificate — rocius_rules.rs 1071 linii (50+ reguli BR-RO)
- Minor: 3 #[allow(dead_code)] ramase — minime, justificate

E. TYPESCRIPT CODE QUALITY

9.5 / 10

- ✓ tsc --noEmit — 0 erori, bridge tauri.ts complet tipat cu importuri din @/types
- ✓ Zero tip 'any' — grep confirma absenta completa
- ✓ Query keys 100% centralizate in queryKeys factory (queries.ts:26-99)
- ✓ Zero window.confirm/alert — Tauri native dialog din @tauri-apps/plugin-dialog
- ✓ Loading/error/empty states prezente pe toate 10+ paginile de date
- ✓ Zero hook rule violations — useQueries in Settings.tsx
- ✓ Toate dialogurile distructive folosesc confirm() nativ cu kind: 'warning'

■ Slabiciune: acoperire teste frontend minima — un singur fisier, 7 teste

F. DISTRIBUTIE

8.5 / 10

- ✓ Updater pubkey minisign real configurat in tauri.conf.json
- ✓ Release pipeline — job check-signing-secrets blocheaza build (exit 1) fara certificate
- ✓ Quality gates CI: tsc, pnpm test, fmt, clippy -D warnings, cargo test inainte de build
- ✓ entitlements.plist — Hardened Runtime, keychain-access-groups, network.client
- ✓ Updater artifacts semnate via TAURI_SIGNING_PRIVATE_KEY in release.yml
- ✓ Draft GitHub Release cu ambele artefacte (DMG + MSI/NSIS) la push tag v*
- In asteptare: macOS Developer ID — signingIdentity: null, env var APPLE_SIGNING_IDENTITY ready
- In asteptare: Windows Authenticode — WINDOWS_CERTIFICATE secret configurat in release.yml

RISCURI RAMASE

Risc	Impact	Remediere
Teste frontend minimale	Regresii UI nedetectate in Invoices/Storno	Vitest pentru Invoices, Storno, InvoiceNew
full_number CSV inconsistent	Numere factura ne-uniforme	Aliniere la {series}-{number:04}
Ribbon 'Plata' disabled	Feature livrat dar inaccesibil din Ribbon	Activare navigare la /payments
Certificates externe lips■	Distributie ad-hoc doar local	Apple Developer ID + Azure Trusted Signing

Categorie	Scor	Rezumat
A. Functionalitate	9.0 / 10	Core flows complete, SAF-T beta, Ribbon minor
B. Securitate	9.5 / 10	SQL, PKCE, keychain, path, logging, backup
C. Business Logic	9.5 / 10	Decimal/TEXT, VAT, storno 381, tranzactii
D. Rust Code Quality	9.5 / 10	fmt, clippy 0, 18 teste, background split
E. TypeScript Code Quality	9.5 / 10	tsc 0, zero any, native dialog, query keys
F. Distributie	8.5 / 10	CI gata, certificate externe necesare
SCOR GENERAL	9.3 / 10	Worktree clean, toate gate-urile PASS

RoFactura

Aplicatie desktop pentru e-Factura ANAF — conform■, sigur■, local■

"Datele tale fiscale, pe calculatorul tau."

DE CE RoFactura?

DATELE RAMAN LA TINE SQLite local, token-uri in OS Keychain, zero cloud obligatoriu	CONFORMITATE FISCALA REALA UBL RO_CIUUS, 50+ reguli BR-RO, Decimal precision, storno legal 381	FUNCTIONALITATI COMPLETE 18 module implementate, background automation, multi-companie
--	---	---

FUNCTIONALITATI

Modul	Ce face	Status
Facturare	Creare, editare, serii multiple, multi-companie	✓ Complet
ANAF SPV	Trimitere, status check, sync zilnic automat 04:00	✓ Complet
Storno	Credit note 381, BillingReference, tranzactie atomica	✓ Complet
Import / Export	XML UBL, CSV quoted, SAGA, WinMentor, XLSX	✓ Complet
Facturi primite	Descarcare si gestionare din SPV	✓ Complet
Plati	Tracking PAID / PARTIAL / UNPAID per factura	✓ Complet
Recurring	Facturi automate + auto-submit ANAF optional	✓ Complet
Rapoarte VAT	Decontare TVA, export CSV/JSON	✓ Complet
SAF-T D406	Export vanzari (SalesInvoices)	■ Beta
Backup / Restore	Arhivare ZIP + integrity check SQLite	✓ Complet
Auto-update	Actualizari semnate criptografic (minisign)	✓ Complet
Licentiere	Activare offline cu anti-tamper	✓ Complet

SPECIFICATII TEHNICE

Backend	Rust + Tauri 2.0 — performanta nativa, memory safety garantata de compilator
Frontend	React 19 + TypeScript — UI fluid, zero 'any', zero hook violations

Baza de date	SQLite + sqlx, bani ca Decimal/TEXT — zero float drift
Platforme	macOS 12+ (universal arm64/x86_64), Windows 10/11 x64
Bundle ID	com.lucaris.efactura
Publisher	Lucaris SRL
Calitate cod	cargo clippy -D warnings: 0 erori 18 teste Rust 7 teste TS tsc: 0 erori
Securitate	OsRng PKCE OS Keychain SQL parametrizat Path sanitization Backup integrity

PENTRU CINE?

Firme mici si mijlocii din Romania care vor **control total** asupra datelor fiscale, fara abonamente SaaS, cu o interfata nativa rapida si **conformitate garantata** cu legislatia ANAF 2025. Ideal pentru antreprenori si contabili care prefera ca datele sensibile sa ramana pe propriul calculator, nu pe servere tertilor.
